

Youth Drug Consumption

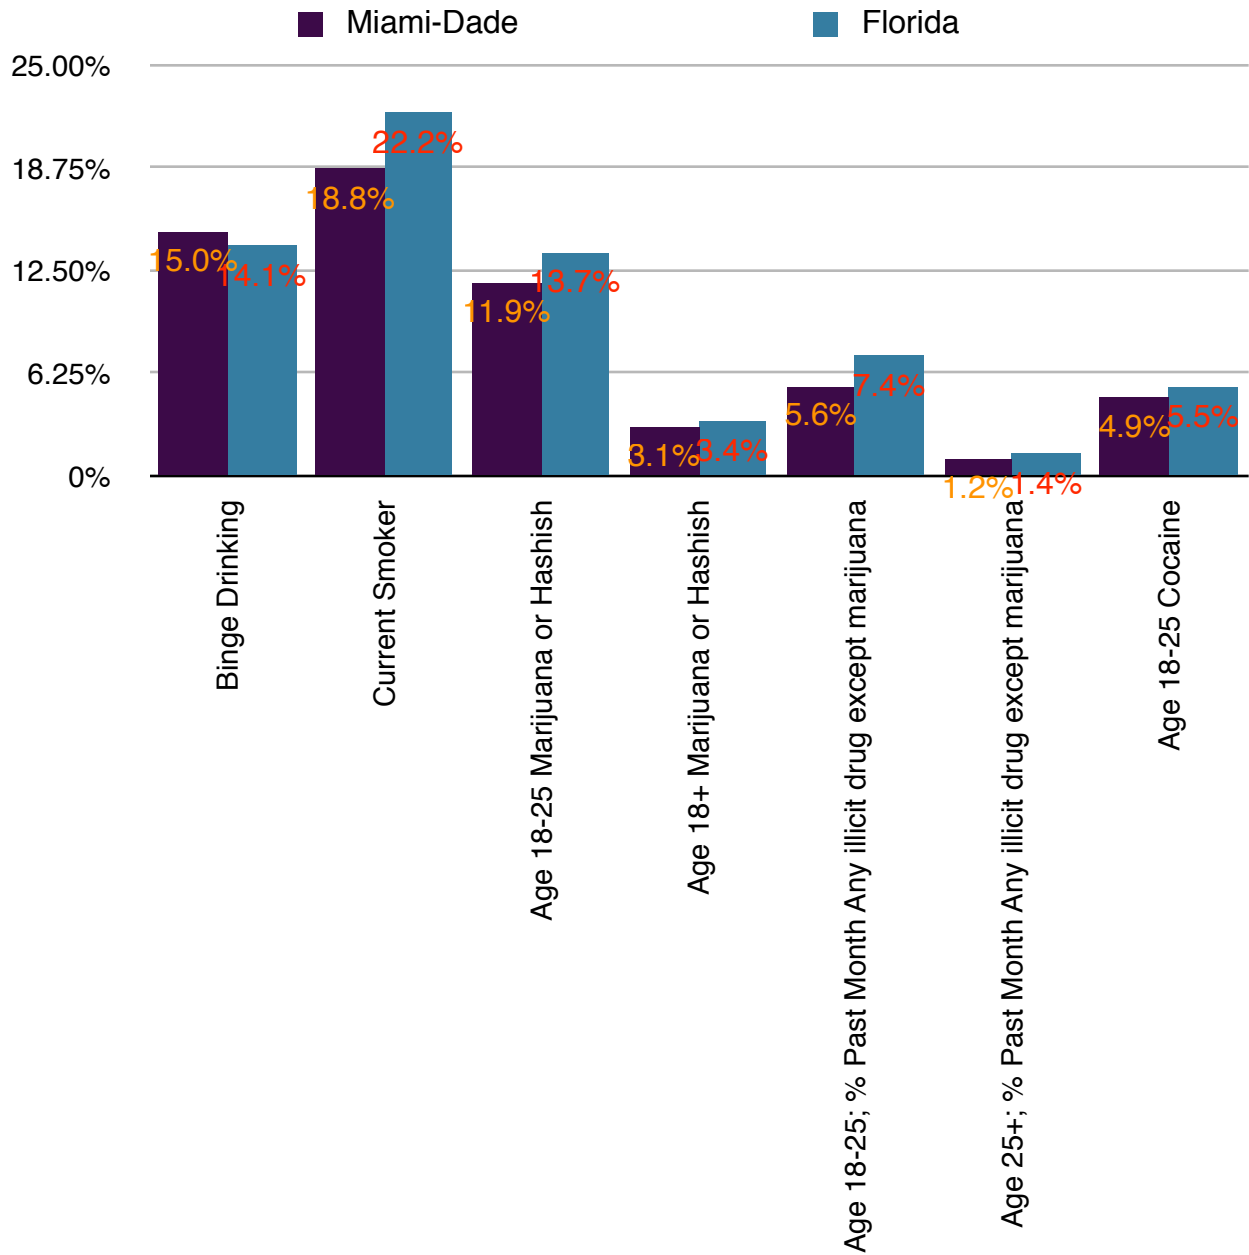

What is this?

The State Epidemiology Workgroup conducted this survey study over 30 days on youth drug consumption in 2004. Due to nature of survey data, accuracy of data has high degree of uncertainty.

Why is it important & how are we doing?

Youth who consume illegal and illicit drugs risk intervention from local law enforcement and are greater at risk. Miami-Dade generally does better than the state on all indicators surveyed here.

Adult Drug Consumption

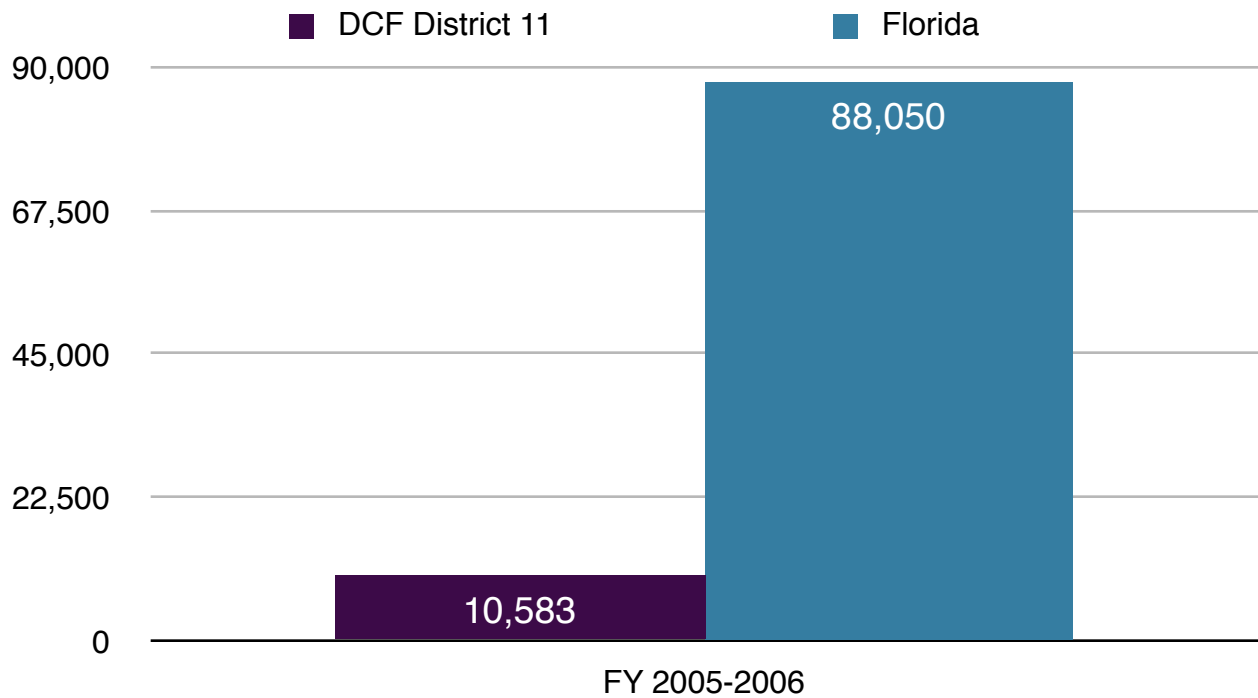

What is this?

The State Epidemiology Workgroup conducted this survey study over 30 days on youth drug consumption in 2004 along with information from Florida CHARTS & DCF. Due to nature of survey data, accuracy of data has high degree of uncertainty.

Why is it important & how are we doing?

Adults who consume illegal and illicit drugs risk intervention from local law enforcement and are greater at risk. Miami-Dade generally does better than the state on all indicators surveyed here with the exception of binge drinking.

Number of Adults Served for Substance Abuse

What is this?

This is the total number of adults assessed as used an illicit substance (or at risk of) who were served for substance abuse in either prevention, treatment/aftercare, or detoxification services.

Why is this important & how are we doing?

This demonstrates that south Florida has a significant share of the state's population who deal with substance abuse.

Success Rate of those Discharged from Substance Abuse Treatment Services

- DCF District 11; % of Adults who Complete Treatment
- Florida; % of Adults who Complete Treatment
- DCF District 11; % of Adults Employed upon Discharge from Substance Abuse Treatment
- Florida; % of Adults Employed upon Discharge from Substance Abuse Treatment
